Presentation outline

- “Trends” and “Availability”
- **Work-Related Qualifications and Part-Qualifications:
Trends 2002 to 2011**
- **Trends Analysis for a Professional Designation**
- **Future Analysis**

“Trends” and “Availability”

Trends:

Year-on-year patterns –

- the number of qualifications achieved, or designations conferred, rather than the number of people, is counted
- the total is usually more than the number of people

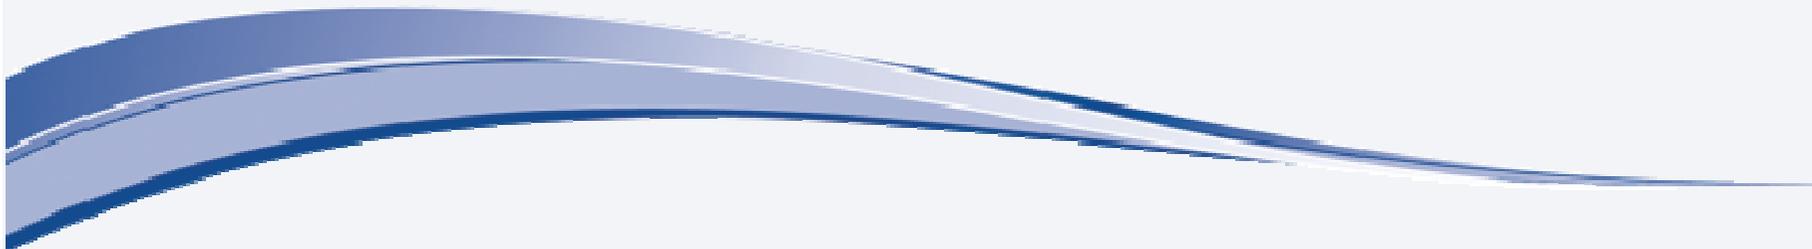

Availability:

The “pool” of people –

- the number of people with qualifications or professional designations at a particular time
- the total is the same as the number of people

**Work-Related Qualifications
and Part-Qualifications
Registered on the NQF:
Trends 2002 to 2011**

Trends in Preceding Qualifications

Preliminary notes:

- The qualifications were analysed according to what is on the NLRD.
- The Senior Certificate records of 3 241 Professional Accountants (SA) are on the NLRD. These are for 1992 onwards. It is assumed that the other 5 129 people obtained their Senior Certificates before 1992.
- 9 999 Non-Senior Certificate qualifications are found for 6 445 people, but none for 1 925 people. One person has 7 qualifications. All except 12 people have their highest qualification at a level higher than NQF Level 4.
- 98% have their highest qualification in NQF Field 3: Business, Commerce and Management Studies

Trends in Preceding Qualifications by Level of Highest Qualification

Future Analysis

- **Compare different designations, within and between Professional Bodies**
- **Further comparison between qualifications and designations**
- **Which learning pathways into a profession are most frequently followed**
- **Suggestions ...?**
